

ComicCraft-AI-AI Powered Comic Story Creator

Project: ComicCraft-AI - AI Powered Comic Story Creator

The demonstration explains the working of ComicCraft-AI from user input to the final generated comic.

Demonstration Steps

1. Open the ComicCraft-AI application.
2. Explain the home page and available input fields.
3. Enter a sample story idea such as: "A shy girl discovers a magical cat that can talk."
4. Select the required number of comic panels.
5. Select the required comic style.
6. Click the Generate button.
7. Show the AI-generated comic story and panels.
8. Explain how the frontend, backend and AI service work together.
9. Show the final output and explain the main features.

Demonstration Objective

The objective is to clearly show that ComicCraft-AI can accept a user's imagination as a prompt and use Generative AI to create an original comic-style story.
