

ComicCraft-AI-AI Powered Comic Story Creator

Project: ComicCraft-AI - AI Powered Comic Story Creator

Requirement analysis identifies what the ComicCraft-AI system must do and the resources required to build and use it.

Functional Requirements

The user can enter a story idea or prompt.

The user can select the required number of comic panels.

The user can select a comic style.

The system sends the request to the AI service.

The AI generates story content for the comic.

The system organizes the generated content into panels.

The user can view the generated comic output.

Non-Functional Requirements

The interface should be simple and user-friendly.

The application should provide useful responses within a reasonable time.

API credentials should be kept secure.

The application should handle invalid input and API errors properly.

Hardware / Software Requirements

Computer or laptop with internet connection.

Python environment.

FastAPI and related Python packages.

HTML, CSS and JavaScript for the user interface.

Google Gemini API for Generative AI.

GitHub Codespaces / VS Code environment for development.
